

Molecular Structure via Computer Simulation Pre-lab

1. What is the name of the computer program used in this experiment?
2. What molecular properties can be calculated with this type program?
3. What is the first molecule to be modeled and draw its structure?
4. How can we improve our representation of the shape of a molecule?
5. What equation is used to calculate the change in energy?
6. How is formal charge calculated?
